This paper describes a new approach to automatically learn contextual knowledge for spelling and grammar correction --- we aim particularly to deal with cases where the words are all in the dictionary and so it is not obvious that there is an error. Traditional approaches are dictionary based, or use elementary tagging or partial parsing of the sentence to obtain context knowledge. Our approach uses affix information and only the most frequent words to reduce the complexity in terms of training ...

1 <u>Is desktop publishing really for every desktop?</u>

100%

Paul Christian

Proceedings of the 16th annual ACM SIGUCCS Conference on User Services January 2000

Because of the proliferation of new hardware and software products aimed at turning all microcomputer users into publishers, editors of newsletters, user documentation, and training materials need to carefully consider the many options available for producing the highest quality product to meet the stated goals of their publications. While there are several distinct advantages to desktop publishing, such as permitting the quick turnaround of near-typeset quality publications, there are many ...

2 Full Papers: A writer's collaborative assistant

100%

Tamara Babaian, Barbara J. Grosz, Stuart M. Shieber

Proceedings of the 7th international conference on Intelligent user interfaces January 2002

In traditional human-computer interfaces, a human master directs a computer system as a servant, telling it not only what to do, but also how to do it. Collaborative interfaces attempt to realign the roles, making the participants collaborators in solving the person's problem. This paper describes **Writer's Aid**, a system that deploys AI planning techniques to enable it to serve as an author's collaborative assistant. **Writer's Aid** differs from previous collaborative interfaces in bot ...

4 Remote usability evaluation: user participation in the design of a Web-based email service

ACM SIGGROUP Bulletin April 1999

Volume 20 Issue 1

A case study is presented in which remote usability evaluation methods were used in the development of a new Internet service. The new service provided access to email using a standard web browser. User session logs, which included keystroke level event records, were examined for approximately 600 of the service trial users. This allowed temporal and activity analysis of user behavior, as well as the detection of general session usage patterns. In addition to keystroke level data, feedback about ...

6 AdaGIDE: a friendly introductory programming environment for a freshman computer science 100% course

Martin C. Carlisle, A. T. Chamillard

ACM SIGAda Ada Letters March 1998

Volume XVIII Issue 2

We have recently transitioned the programming language in our Introduction to Computer Science course at the U.S. Air Force Academy from Pascal to Ada. Providing an intuitive and straightforward Integrated Development Environment (IDE) for Ada that is suitable for freshman use has been one of our greatest challenges. Although we recognize that a number of Ada IDEs are available, these IDEs do not seem to be designed for beginning programmers. Most of them are either too expensive for students to ...

7 A proposed structured collaboration architecture—derived from Scrutiny project

100%

John W. Gintell, Roland F. McKenney

ACM SIGOIS Bulletin April 1995

Volume 15 Issue 3

This position paper describes a proposed architecture for a family of collaborative applications where the collaboration is governed by a definable process. The architecture is derived from lessons learned and generalizations made from a recently completed three year project to build and use Scrutiny, a distributed CSCW system for performing software inspection and review.

Technique for automatically correcting words in text

Karen Kukich

December 1992 ACM Computing Surveys (CSUR), Volume 24 Issue 4

Full text available: pdf(6.23 MB)

Additional Information: full citation, abstract, references, citings, index terms, review

Research aimed at correcting words in text has focused on three progressively more difficult problems:(1) nonword error detection; (2) isolated-word error correction; and (3) contextdependent work correction. In response to the first problem, efficient pattern-matching and n-gram analysis techniques have been developed for detecting strings that do not appear in a given word list. In response to the second problem, a variety of general and applicationspecific spelling cor ...

² A <u>flexible object merging framework</u>

Jonathan P. Munson, Prasun Dewan

October 1994 Proceedings of the 1994 ACM conference on Computer supported cooperative work

Full text available: pdf(1.40 MB)

Additional Information: full citation, abstract, references, citings, index terms

The need to merge different versions of an object to a common state arises in collaborative computing due to several reasons including optimistic concurrency control, asynchronous coupling, and absence of access control. We have developed a flexible object merging framework that allows definition of the merge policy based on the particular application and the context of the collaborative activity. It performs automatic, semi-automatic, and interactive merges, supports semantics-determined m ...

annotations

Full text available: pdf(738.55 KB) Additional Information: full citation, abstract, references, index terms

Annotating paper documents with a pen is a familiar and indispensable activity across a wide variety of work and educational settings. Recent developments in pen-based computing promise to bring this experience to digital documents. However, digital documents are more flexible than their paper counterparts. When a digital document is edited, or displayed on different devices, its layout adapts to the new situation. Freeform digital ink annotations made on such a document must likewise adapt, or ...

15 Interactive Posters: The penguin: using the web as a database for descriptive and	
dynamic grammar and spell checking	
Daniel Fallman April 2002 CHI '02 extended abstracts on Human factors in computer systems	
Full text available: Total pdf(509.73 KB) Additional Information: full citation, abstract, references	
In consequence of emergent limitations of traditional spell and grammar checkers, the Penguin prototype system has been designed to be a descriptive and dynamic tool for computer based writing. Rather than relying on a static dictionary, the web is used as a database to handle language artifacts out of the ordinary, such as idioms, colloquialisms, names, and slang expressions; a common source of concern especially for second language speakers.

² Computer programs for detecting and correcting spelling errors

James L. Peterson

December 1980 Communications of the ACM, Volume 23 Issue 12

Full text available: pdf(1.25 MB)

Additional Information: full citation, abstract, references, citings

With the increase in word and text processing computer systems, programs which check and correct spelling will become more and more common. Peterson investigates the basic structure of several such existing programs and their approaches to solving the problems which arise when this type of program is created. The basic framework and background necessary to write a spelling checker or corrector are provided.

7 Characteristic errors in programming languages

J. D. Gannon

h

January 1978 Proceedings of the 1978 annual conference - Volume 2

Full text available: pdf(608.74 KB) Additional Information: full citation, abstract, references, index terms

This paper examines the features of a small ALGOL-like language for characteristic errors. These errors occur in the general use of a language feature, rather than its use in a

be c ge cf ç

particular program. Language design and defensive programming are suggested as ways of dealing with these errors. Data collected in observing 33 subjects writing small (43-216 lines), but sophisticated programs demonstrate that these errors are both frequent and persistent in the development of programs.

Keywords: Characteristic errors, Defensive programming, Experimentation, Language design, Reliable software

8 Checking for spelling and typographical errors in computer-based text Thomas N. Turba

June 1981 ACM SIGPLAN Notices, Proceedings of the ACM SIGPLAN SIGOA symposium on Text manipulation, Volume 16 Issue 6

Full text available: pdf(1.02 MB)

Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index</u> terms

This paper addresses the problems and techniques of checking for spelling and typographical errors in computer-based text. To some extent, the paper is a combination of a report of work done by the author and a survey of other work which, although not all used by the author, is of equal value and interest. Some of the material presented is related to other aspects of text processing such as data compaction and the efficient searching of very large dictionaries.

Document Contents Representation model of sentence retrieval system SCAT-IR Michiyo Nikkuni, Hajime Tanaka

May 1981 Proceedings of the 4th annual international ACM SIGIR conference on Information storage and retrieval: theoretical issues in information retrieval

Full text available: pdf(542.04 KB) Additional Information: full citation, abstract, references

A "Document Contents Representation" (DCR) model is introduced from a formal viewpoint to deal with the entire contents of a document such as individual sentences of a text, bibliography, references, etc. in a scientific information system. A "Mapping Definition Language" (MDL) is proposed to map directly and naturally the document contents into the DCR model. An application of the DCR model and MDL to scientific documents is shown. Some examples of advanced retrieval by SCAT-IR system implement ...

Natural language with discrete speech as a mode for human-to-machine Alan W. Biermann, Robert D. Rodman, David C. Rubin, J. Francis Heidlage June 1985 Communications of the ACM, Volume 28 Issue 6

Full text available: pdf(1.04 MB)

Additional Information: <u>full citation</u>, <u>abstract</u>, <u>references</u>, <u>citings</u>, <u>index</u> <u>terms</u>, <u>review</u>

A voice interactive natural language system, which allows users to solve problems with spoken English commands, has been constructed. The system utilizes a commercially available discrete speech recognizer which requires that each word be followed by approximately a 300 millisecond pause. In a test of the system, subjects were able to learn its use after about two hours of training. The system correctly processed about 77 percent of the over 6000 input sentences spoken in problem-solving se ...

	Thai OCR error correction using token passing algorithm Rodphon, M.; Siriboon, K.; Kruatrachue, B.; Communications, Computers and signal Processing, 2001. PACRIM. 2001 IEEE Rim Conference on , Volume: 2 , 26-28 Aug. 2001 Page(s): 599 -602 vol.2
	[Abstract] [PDF Full-Text (312 KB)] IEEE CNF

4 A system for recognizing Vietnamese document images based on HM linguistics

Vu Hai Quan; Hoang Kiem; Pham Nam Trung; Lam Tri Tin; Nguyen Duc Hoang Nguyen, A.H.;

Document Analysis and Recognition, 2001. Proceedings. Sixth International

Conference on , 10-13 Sept. 2001

Page(s): 627 -630

[Abstract] [PDF Full-Text (288 KB)] IEEE CNF

5 Thai OCR error correction using genetic algorithm

Kruatrachue, B.; Somguntar, K.; Siriboon, K.;

Cyber Worlds, 2002. Proceedings. First International Symposium on , 6-8 Nov.

Page(s): 137 -141

[Abstract] [PDF Full-Text (420 KB)] IEEE CNF

6 Evolving Ispell: a case study of program understanding for reuse

Aversano, L.; Canfora, G.; De Lucia, A.; Stefanucci, S.;

Program Comprehension, 2002. Proceedings. 10th International Workshop on , June 2002

Page(s): 197 -206

[Abstract] [PDF Full-Text (402 KB)] IEEE CNF

7 SEDACS-a client/server approach to TPS development

Burrus, P.F.;

AUTOTESTCON '95. 'Systems Readiness: Test Technology for the 21st Century'

Conference Record , 8-10 Aug. 1995

Page(s): 403 -409

[Abstract] [PDF Full-Text (708 KB)] IEEE CNF

8 The next generation: CAD/CAM/CAE

Cohen, H.I.;

Electro/95 International. Professional Program Proceedings. , 21-23 June 1995

Page(s): 31 -34

[Abstract] [PDF Full-Text (200 KB)] IEEE CNF

9 Development of a Web-based teaching and learning tool for the engineering students

Cheng, K.W.E.; Chan, K.W.; Kwok, K.F.; Lee, S.K.; Chen, C.H.; Cheung, T.K.; Cheung, S.C.;

Intelligent Multimedia, Video and Speech Processing, 2001. Proceedings of 200 International Symposium on , 2-4 May 2001

Page(s): 166 -169

[Abstract] [PDF Full-Text (324 KB)] IEEE CNF

10 A comparison of standard spell checking algorithms and a novel binaneural approach

Hodge, V.J.; Austin, J.;

Knowledge and Data Engineering, IEEE Transactions on , Volume: 15 Issue: 5

Sept.-Oct. 2003 Page(s): 1073 -1081

[Abstract] [PDF Full-Text (782 KB)] IEEE JNL

11 Visual and textual consistency checking tools for graphical user inte

Mahajan, R.; Shneiderman, B.;

Software Engineering, IEEE Transactions on , Volume: 23 Issue: 11 , Nov. 199

Page(s): 722 -735

[Abstract] [PDF Full-Text (224 KB)] IEEE JNL
